## REVENUE UP ON TRUCK LICENSES

Revenue from licenses for April and May amounted to \$277,738 compared with \$257,185 for the first five months of 1936, according to provincial figures now available. Change in the license year is largely the cause of the increase.

As in the case of passenger cars, truck owners who turn in their plates at the end of the year will be given a 20 per cent. license rebate.

Reports by Mr. Manning, provincial secretary, show that in April and May this year passenger car registrations in this province numbered 68,227, while 12,371 truck licenses were taken out. Number of annual driver licenses issued was 83,208.

Get those new tires now! And for economy and big value get Goodyear "R-1", the new, modern tire that gives more miles of service than any other tire... at or near its price! Get your bonus of extra miles... come in and see the "R-1" today. We'll give you prompt service!

## WILLIAM ELLIS SR., ESTEEMED PIONEER PASSES

**Succumbs From Injuries Received in Car Accident in Vancouver.**

While on vacation in Vancouver, William Ellis Sr., was hit by a swiftly moving automobile. A passing doctor picked up the injured man and took him to the General Hospital where it was found that he suffered from a fractured skull, followed by a hemorrhage, a compound fracture of the left leg and badly injured knees and elbows, as well as numerous bruises. He succumbed to his injuries two days later at 1:40 p. m. on July 9th, without regaining consciousness.

Upon learning of the accident his son Jack left for the coast and accompanied his mother and the body east to Three Hills, Alberta.

Mr. Ellis was in his 78th year, and in splendid health. For the past 21 years Mr. and Mrs. Ellis looked forward to their vacation in Vancouver.

Born in West Calder, Midlothian County, Scotland, on December 27th, 1859, in later years he became prominent in the coal mining industry in the old country, becoming general manager of the William Black and Sons coal mines.

In 1891 he married Miss Martha Dobbie Strang.

In 1907 he came to Western Canada where large deposits of coal were being located, he became interested in a mine near High River. In 1909 he moved into the Champion district, being one of the first coal mine operators in the district. In 1916 he became interested in the Kneehill Valley Coal Company leaving his brother Jim here to take over his interests.

In 1931 he sold his interests in the mine at Kneehill to the Three Hills Coal Company and retired.

Mr. Ellis was a fine character, and was held in esteem by all who knew him. His passing will be mourned by his many friends here and in the Three Hills district.

He was a great community worker, always ready to assist in building up all community projects that displayed improvements. He was a staunch supporter of the Presbyterian church.

He leaves to mourn him in the immediate family, his wife Martha, three sons, Tom, William and Jack, all of Three Hills, his brother Jim of Champion, and Alexandra and David, and sister Jessie in Scotland.

The funeral was held last Thursday afternoon from the Presbyterian church, Three Hills, Rev. Main officiating, interment in the Three Hills cemetery.

## VULCAN FLOUR MILL

VULCAN, ALBERTA

We have been serving the community for the past twelve years, and there is no doubt that we have made a big saving to the community on their flour and feed supply, by bringing your own wheat to the mill and trading it for flour.

The Vulcan Flour Mill is one of the most up-to-date mills, and noted for its cleanliness which means, that your product is handled in the most careful manner.

Our trade has been growing year after year because the people realize how easy it is for them to come to the mill with their wheat, and put up their supply of flour. And we offer further accommodation to people who have no storage at home, we store your flour free of charge until it is used up, and you have the privilege of taking it out as needed.

We trade 100 pounds of flour for 3 bushels of good wheat, with no cash outlay, or you can pay for grinding and take home flour and feed, or store it at the mill.

Take no chances, be sure to have your flour supply up for the coming year.

## Essential Government

Since the onslaught of the new famo and much publicized depression one has heard occasionally the suggestion that municipal government should be abandoned, the province being advanced in the interests of economy. As the depression deepened and its baneful effects became more apparent this proposal was heard more frequently in the prairie provinces—the harvest belt section of the Dominion.

The suggestion has emanated from various sources and has cropped up now and again here and there, but fortunately the idea does not appear to have gained much ground, nor has much weight been given to the suggestion in any influential quarter. It has not received support from those who are able to seriously influence public consciousness.

It is true that the cost of government in this country is too high. There is no gainsaying the statement that public expenditures are excessive and should be curtailed but, even considering the matter solely from an economic viewpoint, it is doubtful whether any saving to the pockets of the people would be effected by the abolition of municipal administration, either urban or rural.

On the contrary, there are very good reasons for believing that such a move would result in an increase in the cost of government.

If there is any form of government which should not be impeded, and still less abandoned, it is local self-government.

There are services rendered by the municipality, urban or rural, which could not be rendered either as effectively or as economically by a more remote authority. It is not necessary to enumerate those services. Any person can at once think of a number of them. They are services which the people would not be content to do without and would not wish to have performed as privately-operated enterprises. In fact, they are now being rendered on a community basis because, for more reasons than one, people have come to the conclusion that such services can be provided more efficiently and more cheaply as municipal enterprises.

Moreover the nature of these services is such that the conditions under which they are provided have to be suitable to local conditions and local requirements. Under long range administration they would inevitably be expected to conform to a pattern which would take into account values in some localities and of little use in others. Further, when changes in form of service were required because of seasonal or local conditions, the necessary changes could not and would not be made effective in time to be of value if appeals had to be made, either to provincial or Dominion capitals.

To offset this handicap of inaccessibility it would be necessary for the central authority to establish and locate officials in every small unit throughout the country and they would have to be clothed with sufficient authority to make rules and regulations to meet changing local conditions, involving the establishment of a regular army of inspectors and administrators who would have no direct responsibility to the people they served and would not be responsive to local demands. Such a system would not only tend to inefficiency but would inevitably be expensive.

But apart from the questions of economy and efficiency involved in such a proposal there is another reason, not only for the retention but the strengthening of local self-government.

Local self-government has often been referred to as the keystone in the arch of democratic government and its removal would weaken the entire structure of democratic government. In this direction it would have a far more serious effect than at first blush might be supposed.

Municipal government is the government closest to the people it serves, and because of this it is the government to which the people are most responsive. It is the kindergarten of all democratic governments and more often than not is the training school for service in the provincial and Dominion arenas. In the local councils the members learn by experience that they must carry out the wishes of the majority if they are to continue in office and yet at the same time afford some protection for the interests of minority groups—the foundation of all democratic rule.

It has not many years since it was demonstrated that abandonment of municipal government would effect one loss of saving to the taxpayer, nor can it be shown that the services rendered by the municipal government could be more efficiently rendered by other and less responsive authorities.

The loss of local self-government would be a serious thing for the people and might well be the beginning of the loss of all self-government.

### Are Flourishing Again

Henry V. Founded Boy Players Of London In 1419

Not long before he died, King George V. was instrumental in reviving the famous Boy Players of the City of London, and during this season these sweet-voiced children, clad in ankle-length Elizabethan surcoats, black velvet knee-breeches and white-plumed hats, have taken part in several performances. Originally founded in 1419 by Henry V., the Boy Players were the only actors admitted to the city of London. The loss of local self-government would be a serious thing for the people and might well be the beginning of the loss of all self-government.

### Physical Training For Youths

Lord Baden-Powell Opposes It For Several Reasons

Lord Baden-Powell, the Chief Scout, attacked gymnastic training for youths.

"There is no reason for gymnastics as far as I can see," he declared at a dinner of the 100 Club at Grosvenor House.

"The finest men I have ever met were so discouraged by the physical food of a healthy child and not by physical food of outdoor exercise."

We are now trying to inflame physical training on poor boys, not very well fed.

"It is not, I think, quite the right kind of developing a strong healthy nation," he added, "because no two boys are alike in physical ability and a great many are not fit for the work of a soldier to a whole squad."—Oversea Daily Mail.

### A Gentle Hint

Two Seamen were watching a football game. One had a bottle, the other only a thirst. The bottlemaster was talking very loudly about his knowledge of the game and what a fine player he was himself. During the conversation he belated himself, thereby to the contents of his bottle, whereupon the thirsty one said, "Well, I notice you're a fine drinker, but you're like gold at passing."

Desert animals and birds, as well as humans, often turn their thirst by tapping barrel cactus, natural water barrels.

### Newfoundland Airport

Modern Methods Waging A Successful Battle With Nature

A group of almost 1,000 unemployed men and \$500,000 in machinery are waging a successful battle with nature, as they lay out a great airport out of virgin timberland in Newfoundland's bid for trans-Atlantic air-route recognition.

Under direction of the president, engineer T. B. Woodyard, of Toronto, one of the builders of St. Hubert's airport, outside Montreal, about 200 men and machines work 24 hours a day; cutting, clearing, ripping, leveling and grading over an 860-acre gas in the dense timber country, 213 miles northwest of St. John's, by rail, and about 130 miles from the capital by plane.

A mile to the east, three towers are rising from another man-made break in the forest where a wireless station with the most powerful and modern equipment available will guide huge planes on their trans-oceanic dashes.

More than 20 tractors, a giant stone crusher, Diesel-powered shovels, ground-rippers, rovers, railway engines, steamrollers, graders, and graders and trucks are working continuously.

Four runways, surfaced with an asphalt-like substance, are planned. No. 3 runway will be 4,800 feet long and 1,500 feet wide while the other three will each be 4,500 feet in length with a breadth of 600 feet.

Work has suddenly been speeded up. The new airport, which is 100 feet wide and running the entire length now completely graded and ready to receive its first plane, although the hard surfacing is yet to come.

The concentration of work on the one end of the Canadian project, supporting persistent rumors a giant wheel-equipped plane is undergoing tests in England in preparation for a trip to the new airport this summer. It is predicted the new plane, with a cruising speed of 200 miles an hour, will make the dash in 10 hours.

### No Liquor Advertising

Broadcasting Corporation Is Not Countenancing Acceptance Of Programs

Major W. E. Gladstone Murray, president of the Canadian Broadcasting Corporation, has issued the following statement:

In view of current misunderstanding and misrepresentation, the Canadian Broadcasting Corporation announces that the acceptance of programs which contain advertising of spirits, wine or beer is not contemplated for any of the stations of the corporation or of its network.

As, however, the Canadian Broadcasting Corporation is responsible for the control of all broadcasting in Canada, consideration is being given to revised regulations.

In this connection special attention is being paid to the presentation of such programs as wine and beer programs in the province of Quebec by private stations where such programs are licensed by the provincial government and by the regulations of the old radio commission and have been broadcast by some private Quebec stations for a number of years.

### Actor Had Hard Struggle

Sir Cedric Hardwicke Worked Hard To Attain Success

Sir Cedric Hardwicke, who has returned to London after a long stay in Hollywood had a hard struggle in his younger days on the stage.

For a long time his private refusal to let him be trained, and even when he got a walking-out part at the Lyceum at the age of seventeen, he was told he was no good.

He was so discouraged by the other experiences that when he returned to civilian life after the war he decided to take up another career. A chance meeting with Sir Harry Lauder, however, made him change his mind.

Sir Cedric claims to have been the last British officer to leave France after the war. It was his duty to haul down the flag at St. Pol in 1924, and he still keeps the flag in his property basket.

He was also one of the officers to man guard over the body of the Unknown Warrior before it was brought to England.—News of the World.

A high school girl, seated next to a famous astronomer at a dinner party, struck up a conversation with him by asking, "What do you do in life?" He explained, "I study astronomy." "Dear me," said the girl, "I finished astronomy last year."

In an accident the only thing better than presence of mind is absence of body.

Shlyanders of Finland are operating 24 hours a day.

### THE NEW PALESTINE

The result of the findings of the Royal Palestine Commission, headed by Lord Peel, calls for the dividing of Palestine into three parts. The heavily shaded area on the seacoast represents the area allotted for the realization of a Jewish national home, while the proposed British-administered neutral zone, including Jerusalem, is indicated by the lower shaded part. The remainder, or two-thirds of the country, is reserved for the suggested Moslem sovereign state.

### SELECTED RECIPES

#### FRUIT SALAD DRESSING

- 1 egg
  - 1 tablespoon sugar
  - 2 tablespoons Crown Brand Corn Syrup
  - 1/2 tablespoon Benson's Corn Starch
  - 1/2 tablespoon mustard
  - 1/2 teaspoon salt
  - 1/2 cup pineapple juice
  - 1/2 cup orange juice
  - 1/2 cup elder vinegar
  - 1/2 cup cream, whipped
- Method: Break the egg into top of double boiler, add sugar, Crown Brand Corn Syrup, Benson's Corn Starch, mustard and salt. Beat all vigorously until there are no lumps in the mixture. Now add the fruit juices and cook in top of the double boiler until the mixture begins to thicken. Stir in the vinegar and grain cook for 10 minute. Strain, and when cold fold in the stiffly whipped cream. This makes a delicious salad dressing for all fruit salads.

### Interested In Children

Queen Mary Attends Garden Party In Aid Of Invalids

Since the accession of the King and Queen it has been noticed that Queen Mary has often taken over the little Princesses at public functions. On June 12 Her Majesty went to a children's garden party held in the titular grounds of Lambeth Palace, where young people were enjoying the fun of the fair with swings, roundabouts and donkey rides. Queen Mary stood on the broad terraces to receive presents from schoolchildren from all over the country and the children of members of the committee who were organizing the garden party. Queen Mary takes a great personal interest in the Invalid Children's Aid Association, for whom the garden party is given. In the past she has been taken over by the little Princesses at public functions. After the garden party, the Queen and the Princesses were entertained at Buckingham Palace, the sweets on the tables have been sent to them at their instruction.

### The Thing That Counts

Not Fortune A Man Has But The Way It Is Used

A dispatch from Calcutta claims that the Nizam of Hyderabad is richer than John D. Rockefeller ever was. The Nizam is reported to have a stack of gold ingots and a collection of gems worth \$500,000,000.

John D. Rockefeller's fortune was estimated at one time at a billion dollars, but Mr. Rockefeller never had \$500,000,000 in liquid and gems.

The fortune he amassed remained in circulation and kept the wheels of industries upon which tens of thousands of other people depended for a living, turning.

The important thing is not the amount of money a man has, but the use to which he puts it.—Detroit Free Press.

A new type of brick retort makes smokeless fuel, gasoline, and heavy oils from any suitable kind of coal.

### No Onions From Spain

One Reason British Market Has Been Opened To Canada

An insignificant placed item in the news the other day tells of onions being exported from Canada to England for the first time during the last fiscal year ending in March. This is no doubt a cause for congratulating the Department of Trade and Commerce, even though the exporters might have wished the total to have been larger.

Why has the market so suddenly been opened to Canada? In the absence of further details it may not be far wrong to guess that Canadian onion-growers can thank the war. The British housewife for years has been accustomed to ask for "Spanish onions" at the greengrocers'. And in addition a familiar autumn sight in and around London, are swarthy, foreign-looking men, shouldering curious strings of onions, knocking at suburban doors, and in broken English offering their wares for sale. These refugees are the sturdy Basques, who venture abroad regularly after the onion harvest to trade a bit and see a little bit more of the world than their own hard country.

There will hardly be any picture of our selling Basques in making this autumn. The only Basques making the journey over to England this year are the hundreds of little refugee children who have lost home and parents and all their little world in the horror of a modern civil war.

A pretty young lady who has on record sales onions to the United Kingdom.

### A Real Grievance

Messenger Boys Had Good Reason For Apparent Courtesy

A pretty young lady who was found herself upward bound in an office-building elevator the other day, in the company of a Postal Telegraph messenger boy. Not only did the boy keep his hat off during the trip, but he held it over his heart. This touchy fellow lady deeply but she was more astonished than touched to meet another Postal Telegraph boy on her trip down, also with his cap clasped to his heart. She finally whipped up enough courage to ask him if this was some sort of office setting in that manner. The lad said, passionately, and with no marked degree of courtesy, "What would you do if you had to wear one of these?" Removing the cap from his head, he pointed to a badge, almost the size of a saucer, that said, in tremendous letters, "ASK ME about the new twenty-five word message."

### One Production

One rank second only to wheat on the basis of world production and, although the crop may be grown under widely different soil and climatic conditions, about 75 per cent of the world crop of oats is produced in six countries, namely, Canada, the United Kingdom, the United States, Germany, France, and Russia.

The term "call money" is applied to money which is loaned on condition that the loan be repaid at any time the person making the loan calls for the money.

It is dissatisfaction that is our salvation. We weren't meant to be contented. Neither nations nor accomplishments lie that way.

At grocers, druggists, stationers and departmental stores.

Warehouses at Calgary, Regina and Winnipeg

### Have Better Safety Record

Deaf Drivers More Careful Than Those With Normal Hearing

There is a belief commonly held that persons licensed to drive automobiles should be physically sound in every way. Experience, however, shows that a physical handicap, if it is not too serious, is actually a better factor.

The Ontario Association for the Deaf in a recent statement pointed out that deaf, and hard-of-hearing drivers, have a better record of safety than those with normal hearing. During the past eight years only five deaf drivers were involved in accidents, none of which ended fatally, or resulted in serious injury, in three of the cases the good-hearing drivers were decreed to be at fault, and the other two cases were due to speeding. The reason for this, of course, is that the deaf driver is unable to rely on his ears to help him at the wheel. Normal drivers in this respect listen for oncoming traffic and the sound of a siren, the driver with impaired hearing is ever on the alert with his eyes as it is upon his sight that he depends more than any other sense. He looks for cars, pedestrians and signals with more intensity.—St. Thomas Times-Journal.

### Versatile Business Man

Merchant In Ontario Town Has Been Blind For Years

Blindness is no handicap to Orville Frayne, called the most versatile business man in Forest, Ontario, Orville, who is "always 21," lost his eyesight through illness when he was 21.

He operates a tobacco and soft drink shop, where he sells rubber mats, lead work and leather boots for himself makes. He also sells and buys livestock, trades in wood, shears sheep, and keeps for rent jacks to raise hickories. Besides, he is an expert euche player. He can read both Braille and New York point, and it is with these systems of raised characters that he plays cards. Other players announce the cards they hold when playing with him.

Orville Frayne is a very busy man, and sometimes days afterward," Frayne says.

His parents are farmers and he frequently visits them and helps with the farm work. Being blind teaches a person to concentrate, and this often gains him the respect of persons in full possession of their sight, he claims.

### New Bone-Setting Formula

Adjustable Brace Allows Animals To Walk On Broken Legs

A new bone-setting formula, expected to save the lives of thousands of animals heretofore destroyed because they would creep off broken legs, was described to the Eastern States Veterinary Association by Dr. Otto Stader, of Ardmore, Pa.

Small animals are put into each side of a broken bone on an adjustable brace. This permits a dog to walk while the break is healing.

It is dissatisfaction that is our salvation. We weren't meant to be contented. Neither nations nor accomplishments lie that way.

At grocers, druggists, stationers and departmental stores.

Warehouses at Calgary, Regina and Winnipeg

And Far Handier Than Older Ways!!!

Here is the most useful waxed tissue package you've ever seen.

This new pack contains 45 sheets of silver white waxed tissue. Through the use of the pack is a metal eyelet for hanging on the wall. Inside the tissue is held in an ingenious grip so that you can withdraw a sheet without time by simply reaching out with one hand.

"Tissue Pack" thus becomes the handiest of all kitchen aids. You will wonder how you ever got along without it.

## THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside  
By PATRICK SLATER  
By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER VIII.—Continued

Bob finally tired of watching the antics of the excited halfer and the silly goings on of the man. He jumped up on Marshall and whined. He invited him to clear a little commonsense. Then he led the man in quite another direction and far off from the cow, and there across the creek and over a little knoll, the excited halfer, chasing after him, saw the two brutes find her hidden calf.

Now, you apprehend, gentlemen, I am merely summing up the facts for your guidance; and from these facts you will draw your own conclusions. I am not suggesting that Bob thought the silly, little, forked-tail cow would ever make the farm stable; it lay lying unprotected in a lonely bush. Neither am I asking you to find on this evidence that Bob wanted the calf of the home-steed because that would make it a simpler job for him to drive the mother up there twice daily. I do not say that Bob wanted the calf taken up at all. I should, however, point out to you that the uncontradicted evidence discloses that the dog showed unmistakable signs of delight as Marshall hoisted the heavy weight of the calf on his shoulders, and gripping the soft, trudged homeward followed by the excited and wild-eyed mother. As I said before, I am merely summing up the facts for you.

It is, of course, merely a play of fancy to attribute to a dog the thoughts of the human mind. What the woman he loves really thinks of him is past any man's finding out; but to that, come to the end of what is going on in the mind of his dog. The human cannot even think that sort of thing, and he thinks he is living in. The creature's concepts of time and space may be different from ours. Objects may appear other color than they are, and sounds that please some human ears are often painfully distressing to a dog. Neither the human nor the dog can ever know the physical world as we as thoughts floating on a stream of consciousness. If that world exists other than as thought, neither of them can know anything about it, and since they cannot talk the matter over and compare notes, the dog and his man can never be quite sure their separate dream worlds are similar in kind to one another.

But a man does know and can understand the feelings and emotions of his dog. He knows, for instance, that the dog has a conscience, and is sorry for his sins, but knows that for the dog anything is a sin that displeases his master; and that in the dog's life such a sin is the consequence because he does not understand. As with the dog, so with the human, sin is caused by lack of love or ignorance.

Well, up to that Monro farm, time kept flying by; and by the spring of 1914 we had reached old Hickory Mick, the Catholic school teacher. The Orange families in the section felt sure in mind, now, that they had for master a man who did not believe in a god at all. Meanwhile, Bob O'New Fritchie had grown into an orderly and quiet dog. Once in a while, he might go off for a day or two, come back with the tang of love in his brown eyes; but the days of joyous play and romping were gone.

**BLACKHEADS**  
Get two ounces of peroxide powder from your drug store. Sprinkle on a hot, wet cloth and rub it over the face. Every blackhead will be dissolved. The one safe, sure and simple way to remove blackheads. Have a Hollywood complexion.

were no more for Bob; nor for his boy, Charlie, who was now a sturdy, vigorous-minded lad of fourteen. They remained as great friends as ever, but neither saw any occasion for displaying feelings that were deepening with the passing years. Charlie had developed into a regular, thorough-going, young farmer, much to his father's pride and joy, and Bob still brought the milk cows home.

Yes, time kept slipping away like rivets from one's fingers. Rev. C. M. Clarke came to the Monro Wesleyan circuit to carry on what he called his paragonic ministry. He was a well-educated young Englishman from the town of Bristol, full of enthusiasm and painstaking to a fault; but he was a greenhorn on his first preaching appointment in Canada—and he was no horseman. He arrived at Monro Mills on foot, and the local Quarterly Board direct of one of his brethren, Thomas Henderson, to secure the new minister a horse to bear him over the long stretches between his preaching appointments. The minister thanked him very kindly, but begged them earnestly to secure him a quiet, docile beast. They finally bought him a bay mare from a farmer down South. The mare, the local brethren had on occasions observed the shabby old mare standing until the latter's head and neck were touching her master's pleasure; and they all agreed she would make a reliable ally for the inexperienced young clergyman.

After powerful assurances had been given him, Rev. Mr. Clarke was hoisted on the saddle and set off on his way. The mare, was gentle with her shaggy carriage, but she pulled up restlessly at the first tavern door on the 6th line, and not a step farther would she budge for him until the harness had disappeared. In those days there was a tavern every mile or two on any road on which the stagecoach stopped. The young clergyman left his gift horse standing at the third tavern door and forced away stoutly on foot. Nor did the mare budge until he made a sudden jump.

Throughout the year, there was a constant stream of visitors to be done on the Marshall farm. Even the floating fish ponds were turning into silver, as salable grey tin, in rule, that kept trying out for hardwood, and were never satisfied. The Canada Jay came around each spring to tell us of the backset and up and tap the sugar maple bush. There was a steady throng of work; but the ways around the place were of hands to it. A neighbor's daughter was helping in the house, and Sarah Duncan, with her sweet, honeyed face, was getting the village high the time, doing the family's sewing and mending. The Marshall boys kept a good number of and wife who lived in; and in the fall of '14 William Edwards and his wife were completing their second year of study at the farm. They had come from down in New York State; and when their time was up, they were to go down to go down home for the winter.

One gets to know people well after living on the same farm with them for two years. Edwards was a quiet, spoken man, clean and tidy in his personal habits, and gentle with the children. He was the place. The children liked him, and tagged after him in his work. His wife, in Mr. Marshall's opinion, was a bit scatter-brained, but she was a caution to work, and she did not talk back. Edwards, himself, was religiously minded in an emotional way. He made a practice of praying aloud; and he made special efforts that God would hear his prayers. As a devotee, Primitive Methodist, he devoutly maintained we should have cold, virtual on the Lord's Day, which all the other boys and girls of the section for a hired man to have. I shall always remember his appearance; his dark hair, his eyes, his nose, his Arthur, the Duke of Wellington. His principal worry in life seemed to be the bald spot that was spreading on his forehead back to the quarters where the pig brains lie. To remedy it, he was using "Close-hug's Trichophore," a severe patent medicine for bald heads in those days, guaranteed to quickly bring hair back into the scalp and grow a healthy scalp after the third bottle.

Everybody about the place felt the young couple were leaving. Sugar maples were turning the time Edwards was paid off, and the couple prepared to go on their way. Above the faded green of the late summer, patches of golden ochre and of brilliant crimson were showing on the hillsides. And, here and there, the frost had dashed the foliage of a spreading branch with the gleam of dark earthy wine, which was fading at the edges into the rich brown of dead leaves lying fluttering down.

The night before they left neighbors dropped over to wish them good good, the respectable young couple were well thought of in the little community. And you know the sort of thing it was. The men cracked butternuts before the high chairs, and the womanfolk amused themselves in their simple way. Hymns were sung and the victuals were served before the party broke up. Oh, yes, Mrs. Edwards would write about the time those giggling women—and told the folk about their trip.

It had been arranged that Charlie Marshall take the wagon and team, and give the Edwards a lift as far as Toronto. And I wish you to know this was a well-considered young Englishman in the eyes of young Charlie. He was being trusted with that valuable team of boys—all on his own, as you may say. He was taking some produce down to his grandma at the Tavern Tyrone—a skin of butter, hams and a few dressed chickens; and he might stay with her for a day or two. So he was all spruced up for the occasion. The harness had been oiled and the wagon wheels greased. Charlie's boots were given to perfection; and Edwards had given him a hand on his trim.

The party set off bright and early in the morning. They left with every line of spirit, and the first of the O'New Fritchie. The dog had planned, of course, to go along; but, at the last moment, Mrs. Marshall played a dirty trick on him and tied him up. But a wise dog knows it is a long lane that has no turning. Bob, however, was of a different opinion. On the day, and consoled his soul in patience.

The sun came for bringing the cows home for the evening milking. So, of course, they let Bob loose. But the dog's mind was not on the cows. He quietly trotted down the lane, and took the first turning to the left. Paddy was sent for the cows; and the harness was left to the producer of wild flowers and mosses.

Since the nineteenth century the harness has been an important producer of fur, and have contributed upwards of \$27,000,000 in fur since 1922. Having in mind the need of the fur, the harness is a bearing animals as a means of life for the Indians and Eskimos in the North.

"Oh! yes," said the dog, "the wife, 'he is greeting for his lad.'"

(To Be Continued)

## In Danger Of Extinction

**Unless Strict Regulations Observed**  
**Whales Will Vanish From Seas**  
The whale, that wanders round the Poles, as Hilaire Belloc has observed, "is not a table fish." Would that were, for whereas heretics the whale is the third largest animal on the ocean to maintain prices the whale, so popular is its oil, is in serious danger of extinction.

If the agreement reached between 14 governments interested in whaling in the world, the whale, that wanders round the Poles, as Hilaire Belloc has observed, "is not a table fish." Would that were, for whereas heretics the whale is the third largest animal on the ocean to maintain prices the whale, so popular is its oil, is in serious danger of extinction.

A Greva convention ratified in 1931, forbade the use of harpoon, and of mature cow whales. (The cow whale is supposed to bear only one calf in two years.) The new agreement also forbade the prohibition to sperm whales, and most important, also fixes a nine months' close season for killing whales from the floating factories.

Last year, after a long and unfortunate dispute with Norway, the British whalers agreed to a three months' harpooning season, and it is obviously desirable that this should become permanent. Although Britain and Norway between them are responsible for four-fifths of the whales caught, it is necessary that the other powers should come in, and it is probable since the efficiency and speed of harpooning and of extracting the oil from the carcasses, that the agreement would limit the whale "output" should also be regularly arranged.

For unless whaling is strictly regulated this remarkable beast may soon join the white rhinoceros in extinction. (Manchester Guardian)

**Governor-Generalities**  
Always humorous Lord Tweedsmuir can be depended on for a sprinkling of laughter when he speaks. Addressing a group recently at Kingston, the Governor-General made some remarks which could not talk on subjects of political contention. He added he was delighted to have the opportunity of saying, "In fact, I am confined to Governor-Generalities."

Found in the rivers and lakes of tropical America, the four-eyed minnow has an upper and lower set of eyes.

Very few parrots breed in captivity in the United States.

## Canada's Western Northwest

## Use Of Aircraft Makes Transportation And Exploration Less Difficult

"Canada's Western Northwest," a companion publication to "Canada's Eastern Arctic," published in 1934, has just been issued by the Lands, Parks and Forests Branch of the Department of Mines and Resources. Most informative and interesting—enlightening—booklet. It is filled with the history, resources, population and administration of the mainland portion of the Northwest Territories and the more southerly islands and the Arctic Archipelago. These reports bring us up to date and correlate available information relating to Canada's Northwest.

Canada's Arctic possessions are geographically divided by Nature into two parts—the Western Arctic, reached from the Pacific ocean and down the Mackenzie river; and the Eastern Arctic to which access is gained from the Atlantic ocean and through bay. Brought about by the ever-widening search for minerals, and by the use of aircraft as a means of transportation and exploration, the importance of the Northwest Territories have undergone considerable change within the past twenty years. These reports bring us up to date and correlate available information relating to Canada's Northwest.

It was in the past century that the Northwest Territories were first explored, and in the short summer the temperatures are high and the long periods of midnight promote rapid growth of vegetation. In many parts of the Mackenzie Valley vegetables are grown for local consumption, and the barren tundra yields a profusion of wild flowers and mosses.

Since the nineteenth century the harness has been an important producer of fur, and have contributed upwards of \$27,000,000 in fur since 1922. Having in mind the need of the fur, the harness is a bearing animals as a means of life for the Indians and Eskimos in the North.

"Oh! yes," said the dog, "the wife, 'he is greeting for his lad.'"

"Canada's Western Northwest" brings out many interesting facts about the population, white and native, the industries, institutions, transportation and communications. It contains 52 illustrations, and gives the latest information available concerning Canada's Western Arctic possessions. Copies may be had upon application to the Director of Lands, Parks and Forests Branch, Department of Mines and Resources, Ottawa.

## There's No Safety in Numbers

## Not Where Flies Are Concerned Anyway

The number of flies that can trace their origin to one single family house-fly during the season runs into the millions. When you consider that each single one of them is an individual carrier of the worst sort of filth, it must be obvious how important it is to combat this menace. Flies delight in feeding on uncovered garbage, refuse, rotting animal and vegetable matter, horse manure, in fact, everything that is particularly offensive to us humans.

Think what may happen if one of these disgusting pests gets into a house and is left unmolested. The baby's toilet, even the sleeping baby's lips, and any food that is drunk or eaten, spots on which he will settle, leaving disease and even death in his wake. What are we to do to get rid of this menace? Remove or protect all the breeding grounds we have mentioned and any others that may prove breeding grounds for flies, keep doors and windows protected with adequate screens. Cover all food and drink at all times. And to make assurance doubly sure, place some Wilson's Fly Pads around the house in every room. The attract the flies and kill them all very quickly.

## By Any Other Name

At a press breakfast given in San Jose, California, the suggestion was made that the prune should be renamed "Pette Pomme." "Noir d'Amor," or "Little Black Apple of Love." However, the growers think that it is a change in name is necessary "Pom" would be sufficient.

## Visits Home Of Ancestors

**Prime Minister Mackenzie King Explores Old Manor House In Scotland**

Mr. W. L. Mackenzie King, Prime Minister of Canada, was able recently to satisfy a lifelong ambition. He traced the birthplace of his paternal grandfather to Ladyford, Tyrone, and had tea in the room in which probably that pioneer was christened. Before leaving, Mr. Mackenzie King was presented with a carved wooden chair which had come from the old church at Tyrone.

It was indeed a day that the Canadian Premier will look back upon with the happiest of memories. Again and again he expressed his delight as he examined the old manor house which was his grandfather's home before he went to Canada with the Royal Horse Artillery.

"It is a great pleasure to me to visit the home of my grandfathers," he said. "I only wish my life could have been here along with me."

It was by the happiest of coincidences that Mr. Mackenzie King was able to satisfy his lifelong wish. When he heard that he was to be offered the freedom of Aberdeen, he immediately wrote to Lady Aberdeen asking if she could make such inquiries as to the birthplace of his grandfather.

Lady Aberdeen got in touch with Mr. A. G. Brown, a former professor of Fraserburgh, who, after making an extensive search, discovered that it was at Ladyford that Mr. Mackenzie King's grandfather, Mr. John King, had spent his early days. It was a short time later that Mr. Brown received conclusive evidence from Register House in Edinburgh that Ladyford had actually been the home of Mr. John King.

The Dominion Premier could hardly wait to visit the old place. They returned to the house, which is surrounded by a lovely garden, descended on the surprised occupant, Mrs. Davidson, tenant of the house, and for an hour Mr. Mackenzie King explored the building and its surroundings, including the old-world atmosphere of the place.

He was particularly interested in seeing the stone steps near the house which served as a mounting and dismounting place for ponies. The building, which is at least 200 years old, is built very solidly of granite, and roofed with old Scots slate. A two-story house with two wide wings projecting forward, it has that substantial appearance typical of the old manor houses of Scotland.

It was in this house that Mr. King's grandfather was baptized on May 3, 1814, and when Mrs. Davidson insisted on her distinguished guest having tea in the room in which probably the ceremony was performed, Mr. Mackenzie King might have known no bounds. (Aberdeen Press and Journal.)

## Room Papered With Stamps

Stamp dealers and collectors in England spent a holiday at North Bersted studying the walls of a room papered with thousands of stamps. This was done by the owner to commemorate Queen Victoria's reign and took him 55 years to finish.

There was a British novel, "General Die in Debt," but it wasn't translated into the Russian.

## Keeps Accurate Record

The United States is far advanced in the matter of keeping records and statistics. They have it down this fine: Every fourteen seconds there is a birth, a death every 22 seconds, an emigration every seven minutes and an immigration every 12 minutes. This results in an increase in population of one every 36 seconds.

Thousands of homes are being constructed in Greece.

## Little Helps For This Week

The maketh me to lie down in green pastures. Psalm 23:2.

O the peace at the heart of nature.  
O the light that is not of day?  
Why seek it clouds pass over, it is just the unchangeable light they veil, and even when the day itself passes I shall see that the night itself only reveals new worlds of light. And to know if I could unwrap fold after fold of God's universe I should only find more and more blessings and deeper and deeper into the love which is at the heart of it all.

What joy it should be for me to tuck up and see God's love in everything, to feel that the blue depths of the sky are a real canopy of blessing, the roof of the house of my Father. To know if clouds pass over, it is just the unchangeable light they veil, and even when the day itself passes I shall see that the night itself only reveals new worlds of light. And to know if I could unwrap fold after fold of God's universe I should only find more and more blessings and deeper and deeper into the love which is at the heart of it all.

## Experiment With Trees

## New Fast Growing Poplar Has Been Evolved In Canada

A new race of poplar is being bred in Canada. Dr. A. Macdonald, assistant Dominion forester, reports. Experiments give promise of a new fast-growing, tough poplar tree specially suited to the needs of the paper and match industries. For the past year or so Dr. C. F. Heilmann, of the Dominion forestry service, who is described by fellow workers as one of the world's most eminent experts on forestry genetics, has been cross-breeding poplars to produce a tree combining the desirable characteristics of several species.

Encouraging results have been obtained. Mr. Macdonald said, "hybrids possessing the fast-growing qualities of the Carolina poplar and the toughness of certain European varieties."

The Carolina poplar reached maturity in 12 or 15 years, but is susceptible to rot at the centre. The slower growing European trees have the advantage of remaining firm throughout.

## King Of The Arctic

## Northern Trader, After Exciting Career, Has Announced His Retirement

Charles D. Brown, a far north trader, who made and lost several fortunes, rescued scores of shipwrecked persons and aided polar explorations in an exciting career as "King of the Arctic," announced his retirement at 70 to "spend the rest of his life in peace."

After 52 years at this northernmost American settlement, Brown expressed only one regret: "Civilization is crowding me out, and there is no farther north refuge."

## Keeps Accurate Record

The United States is far advanced in the matter of keeping records and statistics. They have it down this fine: Every fourteen seconds there is a birth, a death every 22 seconds, an emigration every seven minutes and an immigration every 12 minutes. This results in an increase in population of one every 36 seconds.

Thousands of homes are being constructed in Greece.

FINE CUT

## The Champion Chronicle

C. A. Marshall  
Publisher

Thursday, July 22nd, 1937

With the recent bountiful rains, crop conditions have improved considerably bringing the citizens in this part of the country hope that after all a crop will be garnered, not a heavy one of course, but with a fair price the country will enjoy a measure of prosperity that a few weeks ago seemed out of the question.

In a survey of the territory adjacent to Champion the crops vary from good to poor. The poor class of course will come through increasing in value until the time of maturity. The better class crops will with favorable conditions net their owners a fair average of good quality grain.

Every farmer in the district who can find time should visit the registered seed plots at the Bozarth farm, where the Searle, Alberta Pacific and National Grain Companies have planted some seventeen varieties of pure seed grains, these plots can be viewed at any time and will convince you why you should in future sow pure seed.

It was particularly noticeable during the hot weather how these different species of grain stood up without any serious damage.

Good farming and pure seed will assist you in producing a better crop. Get all the information you can when available on the best varieties of grains and methods used for the best farming and your future crops will be of a calibre that will withstand drought and other elements better than poor seed and inferior farming.

At Plainfield School, on Friday evening, July 23, Honorable Peter Dawson will be

Wm. Cook and family, Mr. and Mrs. Tom Hillard accompanied Dr. and Mrs. Dimock and two little daughters, Pat and Carol, on their motor vacation to New Denver, B. C. and other points.

## HOSPITAL NOTES

Mrs. Rachel of Champion discharged July 20th.

Mrs. Soderquist operated on July 15th.

H. Bradley of Barons dislocated shoulder July 13th.

Mr. Barwell's condition much improved.

Mrs. A. Davies of Champion a patient.

Mrs. O. Anderson of Nobleford a patient.

Miss Mary Sherman of Nobleford operated on July 19th.

Dr. Freeze was the attending physician for the following tonsil cases, Hubert Warren, Berton Hingley and Irvine Larkins all of Champion.

the speaker at a Social Credit meeting. Everybody welcome

For the year 1936, car owners in the Dominion of Canada paid at least \$22,000,000 in tax inquests, federal, provincial and municipal, by virtue of the act they were car owners.

This total includes payments for motor vehicle registrations and the tax on their fuel—8 cents in three provinces, 7 cents in four, and 6 cents in the other two.

In view of the fact the motorist in these respects is taxed solely on the ground he is a motorist, one would think he should be given some return or service, also because he is a motorist. Had this practice been followed from the time motor travel demanded good roads, most of the highway systems of the country would now be paid for. There would have been plenty of money to maintain them. At least 1,250,000 of the citizenry and their families would have facilities for enjoying their private mode of transportation, a convenience they now lack in some of the province. Furthermore the country would have its highway system well maintained.

That would be the justice of the case. Unfortunately the motorist has had to sit by and swallow an unconscionable diversion of most of his money to other causes. Obviously the facts and justice of the case are as far apart as the Poles. At 27.

ORPHANS SOFTBALL  
TEAM VISIT GREAT FALLS

We Orphans received a swell break when Mr. Douglas of Lethbridge asked us if we would go to Great Falls. Did we go?—Who wouldn't?

We left Lethbridge Saturday morning before 8 o'clock, by special bus, stopped at Conrad for dinner and

arrived in Great Falls a little after 10. While there we stayed at the Park Hotel.

About 15 minutes after our arrival the three teams who were to play came up and gave us a welcome we'll never forget. A little later we were invited to the Bottle Factory and treated to soft drinks. We also had a glimpse through the factory.

At 6.30 we played our first game at the American Legion Diamond, with the Great Falls Brewery Girls, winning 4-3.

After our game we were taken down to the swimming pool which was cleared for us. Arrangements were made at the Liberty Theatre for those who wanted to go to a show, but we decided to look over Great Falls first.

Sunday morning we had to ourselves. Some went swimming but most of the morning was spent in taking pictures of the interesting places in Great Falls.

At 2.30 we played the Morris Sporting Goods team, again winning 2-0. After a 20 minute interval we took on the Butcher Local, the Champions of Montana. This game we lost 7-18 which ended our series in Great Falls which we enjoyed very much.

Sunday evening we went to a show at the Liberty Theatre.

Monday morning we were shown through the Morris Sporting Goods store, the sponsor of the Morris team, the radio station and the Court House before leaving for Lethbridge at 11.30. We stopped at Shelby for dinner and arrived at Lethbridge a little after 8 Monday evening, ending one of the most enjoyable trips we ever took or ever hope to take.

We like U. S. fire, but we did not like the idea of being called the Lethbridge Coronets, when we were only the Orphans. Some may think it an honor—we didn't.

YOU Share  
in Canada's  
Greatest  
Co-Operative  
Business

LIFE Insurance is the greatest co-operative business in Canada. As a policyholder, YOU are associated with more than 3,500,000 other Canadians in this great enterprise.

Every business day last year Life Insurance Companies in Canada distributed to Canadian policyholders and beneficiaries, over Half a Million Dollars.

Life Insurance enables YOU to provide financial security for yourself and family. It also benefits the country as a whole through the investment of Life Insurance funds in important public enterprises.

Life Insurance dollars give employment to workers throughout the Dominion. Transportation facilities are extended, highways built, streets paved, schools erected, water, sewage and other necessary works constructed. Life Insurance dollars help to finance the farmer, and bring business to the general store and country merchant.

In the past five years of business depression, Canadian policyholders and beneficiaries received over Eight Hundred Million Dollars in payments from their Life Insurance funds. Life Insurance Companies have fulfilled every obligation one hundred cents on the dollar.

As a policyholder, YOU can take justifiable pride in sharing in this, the greatest co-operative business in Canada.

BASEBALL  
CHATTER

Little Chicago were hosts to the Champion baseball club last Sunday. Owing to the fact that Little Chicago's team could not play here on Wednesday, July 14th on account of rain, a double header was arranged on the Little Chicago diamond, at 1.30 and 5.30. The game at 1.30 was fast with some nice plays, the Champion boys hitting all corners and scoring 15 men. This game ended with a 15-3 score for Champion.

The evening game was better from every angle, the teams settling down to serious ball and a much larger crowd of fans saw Little Chicago again meet defeat by a score of 5-0. In the second game, Champion played real classy ball with no errors.

Dick Latiff did not disappoint the fans, sending the pit out into the wide open spaces making another home run.

Only one hit was allowed Little Chicago in the second game.
